# Certificate of Need (CON)

## Acute Care Beds

In Florida, original CON laws required hospitals to obtain a CON to add acute care beds to existing hospitals. As of July 2004, this bed type can be added to existing hospitals through a notification process to the CON Unit for inventory purposes. Hospitals license and delicense acute care beds through the Agency's Hospital and Outpatient Services Unit and may be required to submit construction plans to the Agency's Office of Plans and Construction.

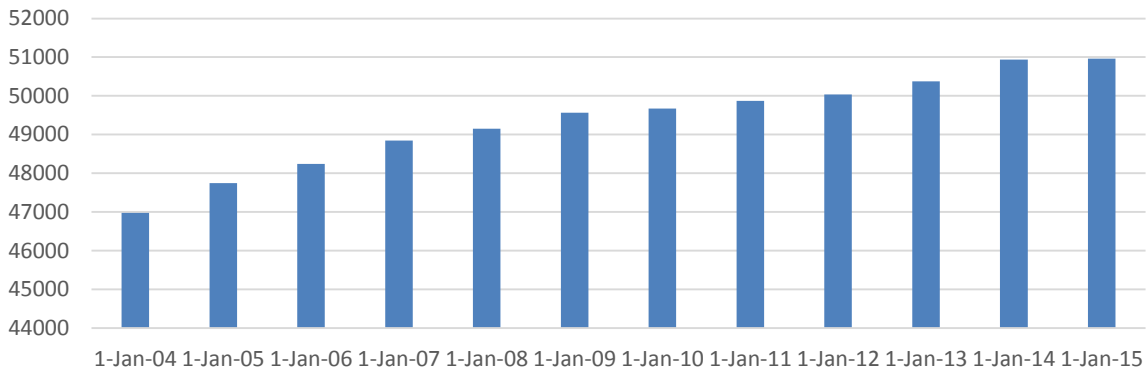

The following charts and graphs illustrate the trends in the inventory of acute care beds by District from January 1, 2004 to January 1, 2015. As illustrated, since the regulatory shift of acute care beds to the notification process, Florida's inventory of acute care beds has increased by 0.74 percent per year on average. From January 1, 2004 to January 1, 2015, Florida's inventory of acute care beds has increased by 8.48 percent.

### Acute Care Bed Inventory by District, as of January 1

Year	District												Percent Change*
